Carol,

Attached please find a copy of the data package for VOC sampling by NAVFAC-Midlant at the TT102D2 monitoring well for VOCs. The TT102D2 well is located on the south side of the SS Pkwy and just east of the SOB Expressway. This well is the well installed up gradient of the MWD well field number 5

This was the third sampling event data package requested. Note that the third sampling event of the TT102D2 monitoring well was non-detect for any VOC contaminants other than those that are lab related.

Please call me direct if you have any questions.

Thanks,

Steve
